DETAILED ACTION

Priority

1. Applicant's claim for domestic priority under 35 U.S.C. 119(e) and 120 acknowledged. Also, acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d). The certified copy has been filed in parent Application No. 10/096810, filed on 03/13/2002.

Status of Application

2. The claims 9-13 are pending and presented for the examination.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 9-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Banholzer et al(US5,610,163).

Claims 9-13 are drawn to a method for treating pulmonary diseases such as chronic obstructive bronchitis and asthma using a salt of tiotropium(e.g. tiotropium bromide) via inhalation.

US'163 teaches a novel composition comprising anticholinergics including a salt of tiotropium(e.g. tiotropium bromide) and its use in the treatment of chronic bronchitis, chronic obstructive bronchitis and asthma, see abstract and claims, especially claims 1-5, 11-12 and 14. Furthermore, US'163 teaches the treatment is carried out effectively

via inhalation, see column 3, lines 27-37 and claims 122-14. Since bronchitis is a condition of chronic or acute inflammation of the mucous membrane of the bronchial tissue(tubes), the limitation recited in preamble of claim 9 is inherently met by the cited reference. For instance, the patented claim 5 teaches a compound of tiotropium.

Thus, all the critical elements required by the instant claims are well taught by the reference and all the claims are anticipated.

Conclusion

5. No claim is allowed.
